FOR IMMEDIATE RELEASE

Ducommun Expands FAA Part 145 Repair Station Capabilities

LOS ANGELES, October 19, 2015—Ducommun Incorporated (NYSE: DCO) today announced that it has achieved expanded Federal Aviation Administration (FAA) Part 145 Repair Station certifications at two operations centers. The Company's Appleton, Wis., facility is now certified to operate as an FAA Part 145 Repair Station with the following ratings: limited accessories-electronic; limited instruments-electronic; and limited radio. In addition, Ducommun's FAA repair station in Phoenix, which has a limited accessories and limited instruments rating, has received additional certification to repair altimeters and gyroscopes.

"We are expanding our commercial aerospace footprint in the aftermarket business. It makes sense to use our expertise to repair the equipment we already know how to build, such as the altimeters and gyroscopes that are installed on a wide range of commercial aircraft. If this equipment is damaged, airlines can count on Ducommun to understand exactly how the product should function and how to repair it cost-effectively," said Anthony J. Reardon, chairman and chief executive officer.

The certifications signify that Ducommun complies with the stringent quality and process requirements set forth by the FAA. Ducommun also operates FAA-certified repair stations at its Carson, Calif., and Joplin, Mo., facilities.

About Ducommun Incorporated

Founded in 1849, Ducommun Incorporated provides engineering and manufacturing services to the aerospace, defense, and other industries through a wide spectrum of electronic and structural applications. The company is an established supplier of critical components and assemblies for commercial aircraft and military and space vehicles as well as for the energy market, medical field, and industrial automation. It operates through two primary business units – Ducommun AeroStructures (DAS) and Ducommun LaBarge Technologies (DLT). Additional information can be found at www.ducommun.com.
