Ducommun Earns ATEX and IECEx Certifications for Oil-and-Gas Products in the European Markets

LOS ANGELES, October 19, 2015—Ducommun Incorporated (NYSE: DCO) today announced it has earned ATEX and IECEx certifications from Intertek AIM for an operations center in Tulsa, Okla., that produces electromechanical products and engineering solutions for customers in the oil-and-gas industry. With these certifications, Ducommun now offers one-stop shopping to customers that deploy oil-and-gas equipment in the European Union and other global markets. Under one roof, Ducommun can both manufacture and certify that products meet global regulatory standards for the prevention of combustion from electronics installed in enclosed, hazardous areas.

“With ATEX and IECEx certifications, we now provide customers a streamlined process for getting their ruggedized electronic products to market in the European Union and other global markets,” said Anthony J. Reardon, chairman and chief executive officer. “We believe the certifications will be a competitive advantage for Ducommun with oil-and-gas customers who would like to get products to market faster and easier.”

Based in England, Intertek AIM audited and certified Ducommun has the quality management system, technical expertise and measures in place to meet the standards established by members of the European Union. Ducommun will undergo regular audits to maintain its ATEX and IECEx designations.

ATEX (explosive atmospheres), developed by members of the European Union, is a set of quality and safety directives based on standards set forth by the European Committee for Electrotechnical Standardization. Developed by the International Electrotechnical Commission System, the IECEx (IEC System for Certification to Standards relating to Equipment for use in Explosive Atmospheres), is a certification system for a broad spectrum of devices and services used in explosive environments, and verifies their conformity to international standards.

About Ducommun Incorporated

Founded in 1849, Ducommun Incorporated provides engineering and manufacturing services to the aerospace, defense, and other industries through a wide spectrum of electronic and structural applications. The company is an established supplier of critical components and assemblies for commercial aircraft and military and space

vehicles as well as for the energy market, medical field, and industrial automation. It operates through two primary business units – Ducommun AeroStructures (DAS) and Ducommun LaBarge Technologies (DLT). Additional information can be found at www.ducommun.com.

Statements contained in this press release regarding other than recitation of historical facts are forward-looking statements. These statements are identified by words such as “may,” “will,” “begin,” “look forward,” “expect,” “believe,” “intend,” “anticipate,” “should,” “potential,” “estimate,” “continue,” “momentum” and other words referring to events to occur in the future. These statements reflect the Company’s current view of future events and are based on its assessment of, and are subject to, a variety of risks and uncertainties beyond its control, including, but not limited to, the state of the world financial, credit, commodities and stock markets, and uncertainties regarding the Company, its businesses and the industries in which it operates, which are described in the Company’s filings with the Securities and Exchange Commission. The Company is under no obligation to (and expressly disclaims any such obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
